

Setting Environment Variables

[Contents](#) [Previous](#) [Next](#)

Goal: Learn how to set proper environment in CDAT.

Python Environment Variables

On all platforms you must unset the following Python environment variables, if they are set:

```
unset PYTHONPATH
unset PYTHONHOME
```

To be able to start CDAT anywhere by typing 'python' or 'cdat' you need to make sure that the path to CDAT appears before the path to python in your path environment variable.
